UNGCNI’s 11th National Convention On Sustainable Development Goals
Print Coverage
MoEF has cleared 900 projects worth ₹6.4 lakh cr since May 2014: Javadekar

The BJP-led NDA government in the last 22 months has cleared a record 900 projects with investment worth ₹640 lakh crore. Besides, the government has substantially reduced the number of days taken for providing crucial environment clearance to 190 days from 600 days and it will be shortly further brought down to 100 days, announced the union minister of state for environment, forests and climate change Prakash Javadekar here on Saturday.

He was addressing a national convention on sustainable development organized by the United National Global Compact Network.

Javadekar told the gathering that "We will make all efforts to do responsible business with a focus on sustainable development. The current government stands committed to provide environment conducive for growth and responsible business.

The government has taken a number of initiatives whereby the faster environment clearances are provided so the project developer can not become the victim of inordinate delays."
‘Commitment to sustainable development full, final’

Union Environment Minister Prakash Javadekar today said the government’s commitment to sustainable development is full and final. Climate change is a reality with one degree rise in temperature caused by 150 years of uncontrolled carbon emission by the developed world, Javadekar said at the 11th National Convention on Sustainable Development Goals here.

While 30 per cent of cumulative contribution was that of the United States, Europe, Canada and other developed countries accounted for 30 per cent and China 10 per cent, whereas India was responsible for only 3 per cent carbon emission, he said.

“The developed world went ahead with business as usual scenario without bothering about environmental impact. Now it has happened, and we are suffering,” he said.

On Prime Minister Narendra Modi’s vision on climate change, Javadekar said “though India is not part of the problem, it wants to be part of the solution.”

India being well aware of its responsibilities was committed to UN Goals on sustainable development, he said.

“Our commitment is reflected in every programme being pursued by the government,” he said.

He listed out Government’s ambitious 175 Giga Watt renewable energy programme, covering solar, wind, hydro-power and nuclear energy as a major step in promoting environment friendly development.

India had taken proactive measures to discourage use of fossil fuels in a bid to reduce carbon footprint, he said.

“The Union Budget 2016-17 has levied a green cess of Rs 6 (Rs 400) per tonne of coal. This is perhaps the highest levy in the world, as even the United States taxes coal at around $5. If the developed world followed India’s example and levied higher taxes on coal, billions of dollars would accrue to pursue clean energy programmes,” Javadekar said.

PRESS TRUST OF INDIA
Our motto is development without destruction

Q&A

PRAGASH JAVADEKAR
Minister of Environment, Forests and Climate Change

Coastal states are advocating changes in the Coastal Regulation Zone (CRZ) norms. What is the present status of the review launched by your ministry?

It is true that the government has received proposals and representations from many states for amending the CRZ Notification, 2013. This had envisaged ensuring of livelihood security to coastal communities, conservation and protection of coastal stretches and marine areas, and promote sustainable development on scientific principles taking into account the dangers of natural hazards in these regions.

As of now an elaborate review is on, meant for taking more care of coastal and marine ecology, while allowing reasonable and sustainable development. That is the focus on our motto: development without destruction. The ministry will make a presentation before the prime minister before announcing changes.

Your colleague, minister of ports Nitin Gadkari, recently announced an aim to develop 200 river ports and a couple of sea ports. The review will take one of those proposed projects.

Has your ministry cleared the much-debated Mumbai coastal road and Mumbai Trans Harbour Link projects?

They have already been approved.

What is the timeline to amend green laws?

Earlier, for violation of environment laws, criminal cases used to be filed. The government is contemplating an amendment to also propose civil penalties. The amendments are on the table.

Besides, we are doing our own job to amend green laws. The Task force committee report was one input. A Parliament standing committee gave inputs. The ministry will take into account all inputs and propose amendments.

What initiatives are being taken by the ministry for ease of doing business?

The success of the Modi government and our team is that we have been able to put everything into motion and provide ease of doing responsible business. I mean sustainable business practices, caring about nature. The average period required during the earlier government for environment clearance was 660 days and this has been brought down to 190 days. It will be further reduced to 100 days.

The ministry has started an online process, every fortnight, a review is held about what is pending and at what stage. Thereafter, corrections are carried out in processes. Essentially, processes have been made transparent, simple. Further, the ministry has standardised the terms of reference (ToR), as it used to take 12 to 15 months. That has reduced to one month for granting ToRs.

Up-to-date directories of finest diversion proposals are dealt by regional centres, with partnership of states. Due to standardisation efforts, the ministry was able to remove unnecessary delays, without compromising on environmental conditions. In the real estate sector, too, the ministry has taken a decision to standardise processes.
Green signal for 900 projects in 20 months: Javadekar

Environmental clearance has been given to 900 projects worth ₹6 lakh crore in the past 20 months, Union minister Prakash Javadekar said, seeking to counter criticism that several projects have been bogged down due to lack of green nod. Javadekar said every effort should be made to safeguard the environment.
‘Govt cleared 943 green projects’

Mumbai: Union environment minister Prakash Javadekar said on Saturday that Centre has cleared 943 projects in the past 21 months.

“The Union environment department was known as ‘road block’ or ‘speed breaker’ as thousands of crores worth of projects were stuck for clearances for many years... However, the Modi government has taken policy decision to clear projects without compromising the environment conditions,” said Javadekar. TNN
AGE CORRESPONDENT
with agency inputs
MUMBAI, MARCH 12

Contrary to criticism on slow environmental clearances, Union environment minister Prakash Javadekar on Saturday said that he has given clearances to 900 projects worth ₹6 lakh crore in the last 20 months. Asserting that environmental clearance should not be a roadblock for development, Mr Javadekar said that every effort should be made to safeguard the environment and also ensure that development projects do not suffer any delay.

“In the last 20 months, my ministry has given environmental clearance to 900 projects entailing an investment of about ₹6 lakh crore,” he said at the national convention on sustainable development goals.

The Union minister further said, “For example, in the previous regime, my ministry was known as a toll (collection) ministry if we take the average of last 10 years, earlier it used to take 60 days to get the environmental nod. Now it takes 190 days. Our effort is to make it 100 days.”

He also said his government had given more powers to the state referring to the defence projects in border areas and also projects in 175 model rubber-affected districts.

The BJP-led government has claimed that the earlier UPA regime was responsible for stalling projects which were now getting green nod at a fast pace.

“Earlier, the environment ministry was perceived as a roadblock ministry and people suffered. We are now making processes transparent and open and decentralising our powers,” he said.

Mr Javadekar also highlighted efforts taken by the government on the pet project of Prime Minister Narendra Modi to clean the Ganga river.

“The change in visible Industrial pollution in Ganga has reduced considerably but more has to be done,” he said, talking about the ₹20,000 crore project.

During the last 70 years, little attention was given to sewage treatment, he said.

“We have asked states to prepare sewage treatment plans. We have prepared norms on disposal of waste, including e-waste, biomedical waste, hazardous waste and building debris. These would be made public after a fortnight,” the minister said.

Blaming the developed countries for carbon emissions, he said that climate change was a reality and the one-degree rise in temperature had been caused by 150 years of unbridled carbon emission by the developed world.
Green nod now in 190 days, says Javadekar

The period to obtain environmental clearance was 600 days during UPA

UNION minister Prakash Javadekar yesterday said the NDA government has brought down the time taken for obtaining environmental clearance for projects to 190 days, from the 600 days that it took during the UPA rule.

He said the Centre’s aim is to further reduce this period to 100 days. “During the UPA government, the average period for environmental clearance was 600 days. However, my ministry has now removed the delay and reduced the period to 190 days. The government wants to further reduce it to 100 days,” the Environment Minister to mediapersons.

Claiming that Modi Government has approved many development projects in the last 21 months by striking a balance between environment protection and development, Javadekar said, “We will not just provide ease of doing business as usual, but we will provide ease of doing responsible business without any delay and that is our assurance.”

While listing out the key projects in Maharashtra, which have got approvals, Javadekar said, “Mumbai Coastal Road project, which was pending for years, has been cleared and will help reduce the pollution of Mumbai and will give boost to the public transport.” — AGENCIES
Environment ministry is no more a ‘roadblock’: Javadekar

**FFP POLITICAL BUREAU**

As a result of efforts on the ‘good governance’ front, the environment ministry has successfully brought down the time required for environmental clearances from over 900 days to 100 days, Union Minister Prakash Javadekar said here on Saturday and added that this has done away with the ‘roadblock ministry’ tag of the department.

“In the UPA regime, my ministry had achieved the tag of ‘roadblock ministry’. But, we have successfully done away with the tag and in the last 20 months, we have given environmental clearance to 643 projects where an investment of about Rs 72,397 crore was locked in,” Javadekar said.

“We took policy decisions, made the processes transparent and decentralised decision making powers. We did this in such a way that the time required for environmental clearances has reduced to 100 days, which helped reduce the load caused due to repetitive clearances,” Javadekar added.

**Union Environment Minister Prakash Javadekar**

“There are 50 sectors of industry that require environmental clearances. The terms of reference (TOR) for each clearance are different. We standardised them, which has brought down the time required for the process from 15 months to 12 days,” he said as he elaborated the good governance efforts in his ministry while speaking to media at the state party headquarters.

“We started accepting online applications for environmental clearances on July 4, 2014. With this, the application process was streamlined. This enables easy follow-up and timely resolution of any problems,” Javadekar said.

While decentralising decision making powers, we streamlined our 10 regional offices. Now environmental clearances up to 50 hectares of land are given by these offices. We also gave more powers to the states,” he said and added that term of environment clearances was increased from one to seven years, which has helped reduce the load caused due to repetitive clearances.

“Similarly, delay in environment clearances after change of ownership of project to has been done away with, he said.

“The defense projects up to 100 km inland from boarders, roads etc. were stuck getting clearance based on standardised rules. This cleared a huge number of projects that were stucked up, he said.

“Earlier in the day, while delivering the Key Note Address at the 11th National Convention on Sustainable Development Goals organised by the Global Compact Network, he asserted that Government’s commitment to sustainable development is full and final. "Climate change is a reality with one degree (at least) temperature caused by 150 years of uncontrolled carbon emission by the developed world,” he said and added that India was responsible for only three percent carbon emission.

“The developed world went ahead with business as usual scenario without bothering about environment impact. Now it has happened, and we are suffering,” he said.

He listed out Government’s ambitious 175 Gigawatt renewable energy programmes, covering solar, wind, hydro-power and nuclear energy as a major step in promoting environment friendly development.

India had launched proactive measures to discourage use of fossil fuels in a bid to reduce carbon foot print, he said.

He also listed out plans to control vehicular pollution by moving to Bharat VI emission norms, policies on waste management and massive tree plantation drive through the Compensatory Afforestation Fund Bill 2015 as other measures aimed at sustainable development.

**Sustainable solution for Metro car shed possible**

**FFP POLITICAL BUREAU**

In response to the Mumbai Metro Car Shed at Aarey Colony controversy, Union Environment Minister Prakash Javadekar said here on Saturday that there are sustainable solutions available to address the issue.

“‘The technology is now available to restart growing trees through mechanised uprooting and re-planting them at an alternative site. Delhi Metro is a standing example in this regard. Wherever, every one tree cut, five more trees were planted, the minister said while delivering keynote note address at Nter的风险 on Sustainable Development Goals,”

“Twooven the Delhi Metro coming up in just 3 years. When the first Metro station was built, there was much hue and cry as five trees had to be cut. But, now after so many years, there are around 250 stations, but so many trees have to be cut and around 250 people are making use of the facility. This certainly has helped protect the environment, as that much fuel, vehicular traffic on roads has been done away with due to the Metro,” he said later while speaking to media.

State Industry minister Shilpa Desai, who belongs to Sion Sora which has opposed the Metro Car Shed at Aarey colony, was present at the program where the Union minister mentioned the project. He, however, denied that his ministry has received any proposal in this regard.

When asked about the said turning linking Thane with Borivali passing under the Sanger Gandini National Park (SGNP), the minister reiterated that his ministry has not received any proposal in this regard.
मेट्रो कारशेड ‘आरे‘तच!

केंद्रीय पर्यावरणमंत्री जावडेकर यांची घोषणा; केवळ 350 ज्यादांवर कुनूनात

"मुंबई मेट्रोच्या कारोबार गोरख वेळीच्या काळात असेल तर केंद्रशासित पर्यावरण मंत्र्यांूंनी ढोरण म्हणून नियमात वापर करावा तरी तासपद पश्चिमात आले, तरी केंद्रीय पर्यावरण मंत्री जावडेकर यांच्या केंद्रशासित पर्यावरण मंत्रालयात यांच्याकडून आपल्या स्थानीय नियमांमध्ये सांगणारे.

मुंबई मेट्रोच्या कारोबार आणि काराकल्पना संबंधातील नियमांमध्ये बदल येणारी आहेत, त्यासाठी संबंधित मंत्रिमंडळांनी या नियमांमध्ये परिवर्तन केलेले आहेत. परिवर्तनांनी मुंबई मेट्रोच्या कारोबाराची उद्योगांची स्थानांतरीय कार वाढण्यासाठी असेल."

"भारत सरकारला तासपद पश्चिमात असायले तरी तक्यास त्याच्या कारोबारात त्याच्या नियमात वापर करावे, त्यासाठी संबंधित मंत्रिमंडळांनी या नियमांमध्ये परिवर्तन केलेले आहेत. त्यासाठी संबंधित मंत्रिमंडळांनी या नियमांमध्ये परिवर्तन केलेले आहेत. परिवर्तनांनी मुंबई मेट्रोच्या कारोबाराची उद्योगांची स्थानांतरीय कार वाढण्यासाठी असेल."
स्थायी विकास के लिए पेड़ हटाने में बुराइयाँ नहीं: जावडेकर

In global first, India Inc to formally adopt UN’s SDGs tomorrow

MUMBAI: Top 50 domestic corporate leaders will be assembling here tomorrow under the aegis of the UN to formally adopt the Sustainable Development Goals (SDGs) of the world body and discuss the way forward for implementation.

The SDGs are the continuum of the 8 Millennium Development Goals (MDGs) which were under implementation from January 2000 to December 2015. These 17 SDGs are being implemented from January 2016 to December 2020.

Commitment to sustainable development full, final: Prakash Javadekar

By PTI | Mar 12, 2016, 04.01 PM IST

MUMBAI: Union Environment Minister Prakash Javadekar today said the government’s commitment to sustainable development is full and final.

Climate change is a reality with one degree rise in temperature caused by 150 years of uncontrolled carbon emission by the developed world, Javadekar said at the 11th National Convention on Sustainable Development Goals here.

While 30 per cent of cumulative contribution was that of the United States, Europe, Canada and other developed countries accounted for 50 per cent and China 10 per cent, whereas India was responsible for only 3 per cent carbon emission, he said.

MUMBAI: Although India is responsible for only three per cent of the global carbon emissions, it is ready to combat climate change and the government’s commitment to sustainable development is full and final, said union environment minister Prakash Javadekar on Saturday.

Stating that climate change was “a reality”, he noted that the global temperature has risen by one degree owing to 150 years of uncontrolled carbon emission by the developed world without bothering about environmental impact.

“While the cumulative contribution of the US, Europe, Canada is 30 per cent, other developed world accounted for 50 per cent. China 10 per cent where India is responsible.

Emphasizing that environmental clearance would not be a roadblock for development, Javadekar said in the last 20 months, his ministry has given eco-clearance to 900 projects worth around Rs 800,000 crore investments.

Environmental clearance has been given to 900 projects worth Rs 6 lakh crore in the last 20 months, Union Minister Prakash Javadekar said today, seeking to counter criticism that several projects have been bogged down due to lack of green nod.

Asserting that environmental clearance should not be a "roadblock" for development, Javadekar said that every effort should be made to safeguard the environment and also ensure that development projects do not suffer any delay.

Mumbai, Mar 12 (PTI): Environmental clearance has been given to 900 projects worth Rs 6 lakh crore in the last 20 months, Union Minister Prakash Javadekar said today, seeking to counter criticism that several projects have been bogged down due to lack of green nod.

Asserting that environmental clearance should not be a "roadblock" for development, Javadekar said that every effort should be made to safeguard the environment and also ensure that development projects do not suffer any delay.

"In the last 20 months, my ministry has given environmental clearance to 900 projects entailing an investment of about Rs 6 lakh crore," he said at the National Convention on Sustainable Development Goals here.

Opposition parties and environmentalists have been accusing the Narendra Modi government of not proceeding on several projects for want of environmental clearances.

Dismissing such criticism, the government has claimed that the earlier UPA regime was responsible for stalling projects which were now getting green nod at a fast pace.

Squaringly blaming the developed countries for carbon emissions and its fallout on climate change, he said,"Climate change is a reality with one degree rise in temperature caused by 150 years of uncontrolled carbon emission by the developed world."

He said though India is responsible for just three per cent of carbon emissions, it is an active partner in finding solution to the problem of climate change and committed to the UN goals on sustainable development.

He also referred to Prime Minister Narendra Modi's emphasis on climate change that "though India is not part of the problem, it wants to be part of the

With 3 percent emissions, India ready to combat climate change

Mumbai, March 12 (IANS) Although India is responsible for only three percent of the global carbon emissions, it is ready to combat climate change and the government’s commitment to sustainable development is full and final, said Union Environment Minister Prakash Javadekar here on Saturday.

Stating that climate change was "a reality", he noted that the global temperature has risen by one degree owing to 150 years of uncontrolled carbon emission by the developed world without bothering about environmental impact.

"While the cumulative contribution of the US, Europe, Canada is 30 percent, other developed world accounted for 50 percent, China 10 percent where India is responsible for only three percent of carbon emissions.

"Though India is not part of the problem, it wants to be part of the solution as it well aware of its responsibilities, committed to United Nations Goals on sustainable development," said Javadekar, addressing the 11th National Convention on Sustainable Development Goals, organised by UN Global Compact Network here.

Elaborating on Prime Minister Narendra Modi’s vision on climate change, he said the government's commitment is reflected in every programme being pursued by the country in this regard.

Javadekar listed out the ambitious 175 GW renewable energy programme covering solar, wind, hydro-power and nuclear energy and other proactive measures to discourage use of fossil fuels to reduce carbon footprint, as a major step in promoting environment-friendly development.

"The Union Budget 2016-17 has levied a green cess of $6 (Rs. 400) per tonne of coal. This is perhaps the highest levy in the world, as even the US taxes coal at around $1. If the developed world followed India’s example and levied higher taxes on coal, billions of dollars would accrue to pursue clean energy programmes," he said.

According to the Pradhan Mantri Ujjwala Yojana under which five crore rural poor households will receive liquefied petroleum gas cylinders at subsidised rates, the scheme has so far reached 76.5 million families.
