Why gender disparity is actually an economic challenge in India

In India, women contribute only 18 percent to the GDP while the world average stands at 37 percent. When will we realise the importance of a truly equal workforce?

By Kanwal Singh

The woman workforce in India contributes a mere 18 percent to its GDP, finds a report by McKinsey. It also underlines the fact that only 25 percent of women account for the total labour force in the country. Unfortunately, their GDP contribution is far below the global average of 37 percent.

Despite all endeavours made by the government, non-profit entities, and corporates, these statistics make us want to pause and ask - Have we really been able to make a significant impact on equal representation of women in the workplace?

Each year, we read a plethora of Women’s Day stories about the increasing participation of women in almost all economic verticals and entry in boardrooms of many companies. Upholding the cause, in a historic move, the Rajya Sabha also passed the Women’s Reservation Bill, under which 33 percent of seats in India’s Parliament and state legislative bodies are reserved for women.
Gender disparity; an economic challenge

United Nations’ Sustainable Development Goal 5 is centred on women emerging as a key differentiator of the development paradigm.

Kamal Singh  March 1, 2020

The women workforce in India contributes a mere 15% in India’s GDP- finds a survey report by McKinsey. It also underlines the fact that only 23% of women account for the total labour force in India. Unfortunately, their GDP contribution is far below the average of 37%, contributed by women globally.

Despite all endeavours made by the Government, Non-Profit entities and Corporate sectors, these stats make us want to take a pause and question -

Have we been able to make a significant impact on equal representation of women in the workplace?

Each year we read a plethora of Women’s day stories about their increasing participation in almost all economic verticals and entry in boardrooms of many companies. Upholding the cause, in a historic move, the Rajya Sabha had also passed the Women’s Reservation Bill, under which 33% of seats in India’s Parliament and
Strategic roadmap for creating a gender equal India Inc

Gender equality is not just a goal; it is a critical prerequisite for sustainable growth.

By, MANISHA NEGANI
Mar 3, 2020 | 5 min read

On yet another International Women’s Day, it’d be wise to look beyond all the rhetoric and fanfare, and take stock of the ground reality. A close look at the numbers reveal that we still have miles to go, when it comes to fulfilling Sustainable Development Goals (SDGs) i.e. Gender Equality targets by 2030. In fact, I am disappointed to state that compared to the talk around gender equality, our pace is slowing.

India ranks 112th out of 155 countries in the WEF’s 2019 gender gap report; specifically, in economic participation, we are among the bottom five. India’s female participation in labour force is a paltry 25%, nearly half that of China and lower than Bangladesh and Sri Lanka. Even those employed suffer from a sharp disparity in pay. Monster’s 2019 Salary
Third edition of Gender Equality Summit to be hosted by Global Compact Network India (GCNI) on March 6, 2020, in New Delhi

New Delhi: Global Compact Network India (GCNI) – A local arm of United Nations Global Compact, New York announced the third edition of its Gender Equality Summit 2020 scheduled to be held at The Park, New Delhi on March 6th, 2020.

The theme of GCNI Gender Equality Summit (GES) 2020 is ‘India Inc for Generation Equality: Decade of Action’. Carrying forward the momentum built on two previous summits held in 2018 and 2019, the GES 2020 will focus on highlighting the role of the current generation in accelerating the gender equality agenda amongst India Inc. The theme for GES 2020 is aligned with the theme for International Women’s Day (8 March) 2020 ‘I am Generation Equality: Realizing Women’s Rights’.

Marking the 25th anniversary of the Beijing Declaration and Platform for Action, the year 2020 represents an unmissable opportunity to mobilize global action to achieve gender equality and human rights of all women and girls. ‘Generation equality’ holds the potential to bring about change – from impacting the lives of rural entrepreneurs to transformation of formal urban workspaces, from policy to design, from institutional to social norms.
Global Compact Network India (GCNI) - A local arm of United Nations Global Compact New York announced the third edition of its Gender Equality Summit, 2020 scheduled to be held at the Park, New Delhi on March 9th, 2020.

The theme of GCNI Gender Equality Summit (GES) 2020 is 'India Inc for Generation Equality: Decade of Action'. Carrying forward the momentum built on two previous summits held in 2018 and 2019, the GES 2020 will focus on highlighting the role of the current generation in accelerating the gender equality agenda among India Inc. The theme for GES 2020 is aligned with the theme for International Women’s Day (8 March) 2020 - I am Generation Equality: Realising Women’s Rights.

Marking the 25th anniversary of the Beijing Declaration and Platform for Action, the year 2020 represents an irreplaceable opportunity to mobilise global action to achieve gender equality and human rights of all women and girls. Generation equality holds the potential to bring about change - from improving the lives of rural enterprises to transformation of formal urban workplaces, from policy to design, from institutional to social norms.
Third edition of Gender Equality Summit to be hosted by Global Compact Network India (GCNI) on March 6, 2020, in New Delhi

The theme of GCNI Gender Equality Summit (GES) 2020 is "India Inc for Generation Equality: Decade of Action". Carrying forward the momentum built on two previous summits held in 2018 and 2019, the GES 2020 will focus on highlighting the role of the current generation in accelerating the gender equality agenda amongst India Inc. The theme for GES 2020 is aligned with the theme for International Women’s Day (8 March) 2020 “To Generation Equality: Realizing Women’s Rights”.

Marking the 25th anniversary of the Beijing Declaration and Platform for Action, the year 2020 represents an unmissable opportunity to mobilize global action to achieve gender equality and human rights of all women and girls. "Generation Equality" holds the potential to bring about change, from impacting the lives of rural entrepreneurs to transformation of formal urban workplaces, from policy to design, from institutional to social norms.

GES 2020 will deliberate on how 2020 India Inc can channel learnings and resources to mobilize and converge greater action towards gender equality, and gender neutrality across industries and sectors. GES 2020 will call on and bring together thought leaders from the Corporate Sector, Governments, not-for-profits and community at large to discuss how gender equality impacts work, and how the future of work would in turn impact gender equality in years to come.

This summit builds from the Goal 5 of the UN Sustainable Development Goals (SDGs) and the Women’s Empowerment Principles (WEPs) to unite India, as it calls for action from the Private Sector, Governments, not-for-profits and community at large. As we step into the next decade, this summit is a platform for discussing the issues in the current day and what is required to ensure gender equality in the years to come.

Key Takeaways:
1. Gain insights on emerging trends on gender equality through the lens of Generation 2020
2. Understand the necessities concerning workplace enrollment practices for working women in the formal and informal space cutting across generations
3. Delve into how to confront traditional norms around gender that are difficult to break
4. Identify the role of young women entrepreneurs in addressing cultural barriers in India
5. Determine focus areas of partnerships for aligning long term business and sustainability goals with the gender equality agenda

Post Event Coverage
Female labour-force participation in India has declined from 34 per cent in 2006 to 24.8 per cent in 2020, according to a new study.

According to the UNGC (United Nations Global Compact) India study, India is the only country among the 153 surveyed countries where the economic gender gap is larger than the political gap.

The study found that raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27 per cent.

The female labour-force participation in India has declined from 34 per cent in 2006 to 24.8 per cent in 2020, the study said.

"Gender stereotypes and lack of infrastructure has traditionally sidelined women from core manufacturing functions. As a result, not many are able to reach leadership roles," it said.
New Delhi [India], Mar 09 (ANI): Global Compact Network India (GCNI) - a local arm of United Nations Global Compact, New York today conducted the third edition of its Gender Equality Summit, 2020 at The Park, New Delhi.

Coinciding with the International Women’s Day, UNGCNI’s third Gender Equality Summit today, linked the international theme with the Indian context to highlight the current generation as a key driver and the India Inc. as a key catalyst for gender equality. This summit today aimed towards building a concrete roadmap towards gender equality at workplaces in India. It focused on driving and bringing in change for inclusive and equal opportunities in employment and growth for the women workforce.

Theme paper on Rethinking Gender Representation across Value Chains unveiled:
* Female estimated earned income is a mere one-fifth of male income, which is also among the world’s lowest (144th)
* Women only account for 14 per cent of leadership roles (136th) and 30 per cent of professional and technical workers.
* Raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27 per cent.
पुरुषों और महिलाओं के समान अवसर के बग़ार सम्पूर्ण विकास संभव नहीं

नयी दिल्ली 6 मार्च (वार्ता) संयुक्त राष्ट्र ग्लोबल कॉम्पैक्ट की भारतीय इकाई ग्लोबल कॉम्पैक्ट नेटवर्क इंडिया ने कहा है कि एक देश और इसके समाज का समग्र विकास तभी संभव है जब पुरुषों और महिलाओं को एक समान अवसर उपलब्ध कराने जा रहे और उन्हीं मायने में देश के विकास का सुनिश्चित करने के लिए लिंग समानता जरूरी है।

संगठन के कार्यकारी निदेशक कमल देसाई ने अंतरराष्ट्रीय महिला दिवस के उपलक्ष्य में लेखन करते हुए दिया कहना कि यह लेखन समानता शिक्षा सम्मेलन के तीसरे संस्करण में यह बात कही। उन्होंने कहा कि लेखक ने समानता का अर्थ सिर्फ़ कार्यकारी कार्यकारिणी को महिलाओं के लिए सुरक्षित बनाने के साथ बताया है, लेकिन घरों और समाज को भी उनके लिए सुरक्षित बनाना होगा। भारत लिंग समानता की दिशा में बढ़ रहा है, ऐसे में संयुक्त राष्ट्र के स्वतंत्र विकास लक्ष्य 5 के अंतर्गत ये समस्तीर्थी भारतीय कंपनियों पर भी आ जाती है। भारत में सभी महिलाओं और लड़कियों के लिए लिंग समानता को सुनिश्चित करना होगा।

इस संवाद में विभिन्न क्षेत्रों से 250 से अधिक प्रतिनिधियों ने हिस्सा लिया जिन्होंने 'महिला सशक्तीकरण' पर अपने विचार रखे। इस दौरान कई महत्वपूर्ण विषयों पर चर्चा की गई जैसे विभिन्न संगठनों एवं आयुक्त श्रृंखलाओं ने लिंग समानता को बढ़ावा देने के लिए सामाजिक रणनीतियाँ, संगठनों में ऐसे प्रोग्रामों, नीतियों एवं प्रथाओं पर ध्यान देने जो एक समान भूमिका दर्शाते हैं प्रतिनिधियों को सुनिश्चित कर सकें।

More women in ‘soft’ jobs, fewer managers, says UN body report

New Delhi: Representation of women in the workforce has been dipping, both in terms of numbers and quality, says a joint report by the United Nations Global Compact, a conglomeration of corporate bodies, and Grant Thornton that was released on Saturday, a day ahead of International Women’s Day.

The kind of work women find representation in has, meanwhile, been heavily skewed towards those that require soft skills — BPO, teaching and desk-based jobs — and not those that need managerial skills. Earlier, the Global Gender Gap Report, released by the World Economic Forum in 2019, had said women across the world would need 257 years to get economic parity with men. That parity is directly linked to the space women find in workplace.

“Barriers to women’s involvement vary by industry and, often, reflect industry cultures as well as overarching economic and social factors...Women are preferred in teaching, clerical and low-level jobs,” the latest report says. This translates into women not getting opportunities to take ownership of work they do. For instance, while 75% of farm workers are rural women, only 13% own their land.

On similar lines, having women in leading positions in the workplace creates a more inclusive space. The evidence is compelling. Representation of women in businesses owned by women is very high — 90% in the manufacturing sector and 81% in the services sector. To put this in context, the labour force participation of women across sectors is 24.8%, down from 34% in 2006.

“A look at this year’s Fortune 500 India list shows only 29 companies have women leaders with executive powers — majority of which are in the banking and financial services sector,” the report says. This, however, does not mean the banking and financial services sector is doing better. The quality of representation, too, matters. “In general, banks tend to have a higher share of female subordinates than private sector banks,” it adds. The report mentions that progressive initiatives to connect women to economy have been made from time to time. “For example, under Pradhan Mantri Jan Dhan Yojana, women hold 53% of bank accounts,” it says.

Female labour-force participation in India dropped from 34% in 2006 to 24.8% in 2020: Study

Prime News, Nation, (New Delhi), March 7: Female labour-force participation in India has declined from 34 percent in 2006 to 24.8 percent in 2020, according to a new study.

According to the United Nations Global Compact (UNGC) India study, India is the only country among the 133 surveyed countries where the economic gender gap is larger than the political gap.

The study found that raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27 percent. The female labour-force participation in India has declined from 34 percent in 2006 to 24.8 percent in 2020, it said.

“Gender stereotypes and lack of infrastructure has traditionally sidelined women from core manufacturing functions. As a result, not many are able to reach leadership roles,” it said.

Companies need to ensure policies and procedures are made to adapt to various life changes in their employees, including maternity, changing care needs, dual career couples and continuity, the study said.

“Globally, 3.7 percent of employed women are working in agriculture, forestry and fisheries, but only 1.38 percent of landholders are women,” it said.

It is the need of the hour that public policy and corporate policies incorporate various gender related barriers in India to ensure effective solutions, according to the study.

“Gender mainstreaming goes beyond developing separate women’s projects within work programmes or women’s components within existing activities in the work programmes. It requires attention to gender perspectives as an integral part of all activities across all programmes,” it said.

This summit today aimed towards building a concrete roadmap towards gender equality at workplaces in India. It focused on driving and bringing in change for inclusive and equal opportunities in employment and growth for the women workforce. The summit witnessed over 250 leaders across the sectors sharing insights on ‘women empowerment’. Key discussions at the summit included gaining an understanding of strategies adopted by leadership to promote a gender-neutral culture across hierarchies within the organisations and supply chains; insights on unique policies, practices, and programs that are structured within organisations to nurture participation and representation. It also focused on how women empowerment could be simulated in digital jobs, role of young women entrepreneurs in addressing social, economic and cultural barriers preventing exploration of unconventional roles and responsibilities in India. At the summit, Top Best Innovative Practices Awards ‘Women at Work – Place’ were presented to: • Public Sector – ONGC • Private Sector – Winner – Nestle, Runner’s Up – Zensaar • NGO Sector – Bharati Foundation • Academic Sector – Salipur School • Special Jury Recognition Award – First Steps Babywear Pvt. Ltd. Mr. Kamal Singh, Executive Director, Global Compact Network India said, “Holistic development of the nation and its societies can only happen if we assign equal value to both genders. For the growth and true success of the nation, gender diversity is imperative and we should strive towards achieving it. We need to keep in mind that Gender equality is not about creating safe and inclusive workplace for women but our homes and society at large too. As India moves towards becoming a nation that treats all genders equally, the responsibility of the same rests on the hands of India Inc. in achieving Goal 5 of the United Nations (UN)”
Gender Equality Summit: How Youth Can Help Achieve Gender Equality

Coinciding with the International Women’s day, UNGCNI’s third Gender Equality Summit today, linked the international theme with the Indian context to highlight the current generation as a key driver and the India Inc as a key catalyst for gender equality.
More women in soft jobs, fewer managers, says UN body report

The kind of work women finds representation in has, meanwhile, been heavily skewed towards those that require soft skills and not those that need managerial skills.

Rohan Dua • TNN • March 08, 2020, 13:56 IST

New Delhi: Representation of women in the workforce has been dipping, both in terms of numbers and quality, says a joint report by the United Nations Global Compact, a conglomeration of corporate bodies, and Grant Thornton that was released on Saturday, a day ahead of International Women’s Day.

The kind of work women find representation in has, meanwhile, been heavily skewed towards those that require soft skills — BPO, teaching and desk-based jobs — and not those that need managerial skills.
NEW DELHI: Representation of women in the workforce has been dipping, both in terms of numbers and quality, says a joint report by the United Nations Global Compact, a conglomeration of corporate bodies, and Grant Thornton that was released on Saturday, a day ahead of International Women’s Day.

The kind of work women find representation in has, meanwhile, been heavily skewed towards those that require soft skills — BPO, teaching and desk-based jobs — and not those that need managerial skills. Earlier, the Global Gender Gap Report, released by the World Economic Forum in 2019, had said women across the world would need 257 years to get economic parity with men. That parity is directly linked to the space women find in workplace.
Titled, Rethinking Gender Representation across Value Chains, the paper highlighted that an estimated 15 million girls and 10 million boys of primary school age are out of school. If education also encapsulated in the Modi government's push for Beti Bachao Beti Padhao programme is the basic criterion of empowering women, this factor alone explains why women are consistently falling behind men in spheres of life.

Some other worrisome data reflecting the scale of gender discrimination highlighted in the paper are:

Women comprised 39 per cent of the workforce in 2016, but held only 27 per cent of managerial positions.

About 18 per cent of women and girls aged 15 to 49 have experienced physical and/or sexual violence by an intimate partner in the past 12 months in the 30 countries where female genital mutilation (FGM) is concentrated.

Globally 38.7 per cent of employed women are working in agriculture, forestry and fisheries, but only 13.8 per cent of landholders are women. The lack of sex-disaggregated data in the environment domain affects the development and implementation of effective policies and programmes to address the gender-environment nexus.
Female Labour-force Participation in India Dropped from 34\% in 2006 to 24.8\% in 2020: Study

March 7, 2020

New Delhi: Female labour-force participation in India has declined from 34\% in 2006 to 24.6\% in 2020, according to a new study.

According to the United Nations Global Compact (UNGC) India study, India is the only country among the 153 surveyed countries where the economic gender gap is larger than the political gap.

The study found that raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27\%. The female labour-force participation in India has declined from 34\% in 2006 to 24.8\% in 2020, it said.
International Women's Day: Female Labour-Force Participation In India Declined By 9.25% In 2020, Says Study

Female labour-force participation in India has declined from 34 per cent in 2006 to 24.8 per cent in 2020, according to a new study.

New Delhi: Female labour-force participation in India has declined from 34 per cent in 2006 to 24.8 per cent in 2020, according to a new study.

According to the UNGC (United Nations Global Compact) India study, India is the only country among the 133 surveyed countries where the economic gender gap is larger than the political gap.

The study found that raising women's participation in the labour force to the same level as men can boost India's GDP by 27 per cent.

The female labour-force participation in India has declined from 34 per cent in 2006 to 24.8 per cent in 2020, the study said.

"Gender stereotypes and lack of infrastructure has traditionally sidelined women from core manufacturing functions. As a result, not many are able to reach leadership roles," it said.
Global Compact Network India (GCNI) – A local arm of United Nations Global Compact, New York conducted the third edition of its Gender Equality Summit, 2020 at The Park, New Delhi.

Theme paper on 'Rethinking Gender Representation across Value Chains' unveiled during the summit. The report suggested that raising women's participation in the labour force to the same level as men can boost India's GDP by 27%.

New Delhi, Delhi, India Theme paper on ’Rethinking Gender Representation across Value Chains’ unveiled
• Female estimated earned income is a mere one-fifth of male income, which is also among the world’s lowest (144th) • Women only account for 14% of leadership roles (136th) and 30% of professional and technical workers • Raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27% • India is the only country among the 153 countries where the economic gender gap (35.4%) is larger than the political gap (41.1%) • LGBT talent pool is seen as one of the key enablers in the coming decade • Globally, 38.7% of employed women are working in agriculture, forestry and fisheries, but only 13.8% of landholders are women Global Compact Network India (GCNI) - A local arm of United Nations Global Compact, New York today conducted the third edition of its Gender Equality Summit, 2020 at The Park, New Delhi.

Coinciding with the International Women’s day, UNGCNI’s 3rd Gender Equality Summit today, linked the international theme with the Indian context to highlight the current generation as a key driver and the India Inc. as a key catalyst for gender equality. This summit today aimed towards building a concrete roadmap towards gender equality at workplaces in India. It focused on driving and bringing in change for inclusive and equal opportunities in employment and growth for the women workforce.

The summit witnessed over 250 leaders across the sectors sharing insights on ‘women empowerment’. Key discussions at the summit included gaining an understanding of strategies adopted by leadership to promote a gender-neutral culture across hierarchies within the organisations and supply chains, insights on unique policies, practices, and programs that are structured within organisations to nurture participation and representation. It also focused on how women empowerment could be stimulated in

Coinciding with the International Women's day, UNGCNI's third Gender Equality Summit today, linked the international theme with the Indian context to highlight the current generation as a key driver and the India Inc as a key catalyst for gender equality.

This summit today aimed towards building a concrete roadmap towards gender equality at workplaces in India. It focused on driving and bringing in change for inclusive and equal opportunities in employment and growth for the women workforce.

Theme paper on 'Rethinking Gender Representation across Value Chains' unveiled Female estimated earned income is a mere one-fifth of male income, which is also among the world's lowest (144th) Women only account for 14 per cent of leadership roles (136th) and 30 per cent of professional and technical workers Raising women's participation in the labour force to the same level as men can boost India's GDP by 27 per cent India is the only country among the 153 countries where the economic gender gap (35.4 per cent) is larger than the political gap (41.1 per cent) LGBT talent pool is seen as one of the key enablers in the coming decade Globally, 38.7 per cent of employed women are working in agriculture, forestry and fisheries, but only 13.8 per cent of landholders are women The summit witnessed over 250 leaders across the sectors sharing insights on 'women empowerment'. Key discussions at the summit included gaining an understanding of strategies adopted by leadership to promote a gender-neutral culture across hierarchies within the organisations and supply chains, insights on unique policies, practices, and programs that are structured within organisations to nurture participation and representation.
Coinciding with the International Women’s Day, UNGCNI’s third Gender Equality Summit today, linked the international theme with the Indian context to highlight the current generation as a key driver and the India Inc as a key catalyst for gender equality.

This summit today aimed towards building a concrete roadmap towards gender equality at workplaces in India. It focused on driving and bringing in change for inclusive and equal opportunities in employment and growth for the women workforce.

Theme paper on 'Rethinking Gender Representation across Value Chains' unveiled Female estimated earned income is a mere one-fifth of male income, which is also among the world’s lowest (144th). Women only account for 14 per cent of leadership roles (136th) and 30 per cent of professional and technical workers. Raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27 per cent. India is the only country among the 153 countries where the economic gender gap (35.4 per cent) is larger than the political gap (41.1 per cent). LGBT talent pool is seen as one of the key enablers in the coming decade. Globally, 38.7 per cent of employed women are working in agriculture, forestry and fisheries, but only 13.8 per cent of landholders are women.

The summit witnessed over 250 leaders across the sectors sharing insights on ‘women empowerment’. Key discussions at the summit included gaining an understanding of strategies adopted by leadership to promote a gender-neutral culture across hierarchies within the organisations and supply chains, insights on unique policies, practices, and programs that are structured within organisations to nurture participation and representation.

Theme paper on ‘Rethinking Gender Representation across Value Chains’ unveiled

Female estimated earned income is a mere one-fifth of male income, which is also among the world’s lowest (144th)

Women only account for 14% of leadership roles (138th) and 30% of professional and technical workers

Raising women’s participation in the labour force to the same level as men can boost India’s GDP by 27%

India is the only country among the 153 countries where the economic gender gap (35.4%) is larger than the political gap (41.1%)

LGBT talent pool is seen as one of the key enablers in the coming decade

Globally, 38.7% of employed women are working in agriculture, forestry and fisheries, but only 13.6% of landholders are women
